

Climatic Parameters for AGRA

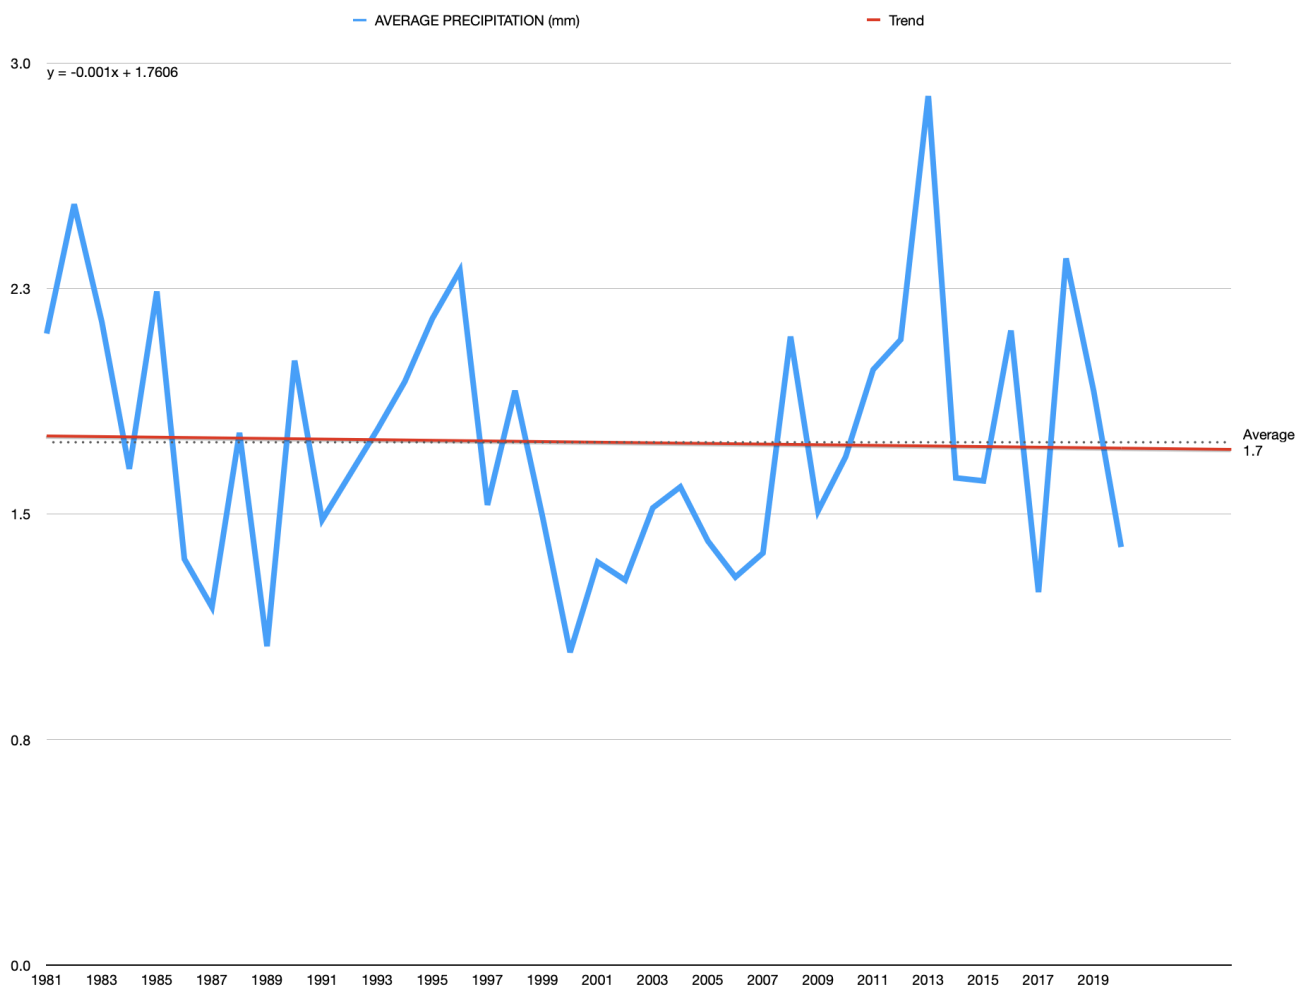

Latitude 27.1767 Longitude 78.0081

Temperature

- Equation of trend: $y = 0.0009x + 26.484$
- Trend depicts an overall increment in temperature of the location
- Average value = 26.500 C

Precipitation

- Equation of trend: $-0.001x + 1.7606$
- Trend depicts an overall drop in annual rainfall received.
- Average value = 1.7 mm

Overall, the place under observation, AGRA, shows an increment in temperature with a decrement in annual rainfall, depicting the climate heading towards a dry spell.
